- 10 Social media has significantly transformed our communication methods by _____ both virality and efficiency.
(A) endangering (B) enhancing (C) envisioning (D) evolving

請依下文回答第 11 題至第 15 題

Earthquakes are caused by the movement of 50-mile-thick plates that comprise the earth's crust. More than two thousand earthquakes occur daily somewhere on our planet, but about 95 percent of them are too weak to be felt 11 sensitive seismometers. 12 are felt by humans, most cause relatively little damage, particularly if they occur in sparsely 13 areas.

Scientists have observed that certain phenomena seem to occur before an earthquake as the pressure within the plates intensifies. Myriads of tiny cracks appear in the rock, causing it to expand and uplift the ground above it. The pressure squeezes water out of the rock, thereby 14 nearby water levels. Also the rock becomes more resistant to electric current, and radon gas is released. Scientists hope that these 15 phenomena will provide keys to predict when and where an earthquake will occur, thereby enabling them to warn people to evacuate the area. While the earthquake itself cannot be prevented, at least lives may be saved.

- | | | | | |
|----|------------------|---------------------|-------------------|------------------|
| 11 | (A) accepting by | (B) except by | (C) additional to | (D) in addition |
| 12 | (A) Of those | (B) Among them that | (C) Of those that | (D) Of them |
| 13 | (A) inhabiting | (B) inhabit | (C) inhabitant | (D) inhabited |
| 14 | (A) rises | (B) raising | (C) raises | (D) arising |
| 15 | (A) interrelated | (B) interrelate | (C) opposite | (D) oppositional |

請依下文回答第 16 題至第 20 題

There are basically two types of stress placed on human beings. One type involves physical activity and its demands; the other type is the result of mental and emotional demands. Whether physical or emotional in origin, stress causes the body to react in similar ways. In the first stage, your body prepares to meet the stress. The heartbeat and respiration rates increase, and the pupils of the eyes **dilate**; the blood sugar level increases, and the perspiration rate speeds up, while digestion slows down as blood and muscular activity is diverted elsewhere. In the second stage, your body returns to normal and repairs any damage caused by the stressful situation. However, if stress continues, the body cannot repair itself, and the final stage, exhaustion, then begins. If this stage continues, physical and emotional damage will occur. These stages of stress reaction are generally the same, whether the stress is caused by a cross-country run, a first date, buying a house, or narrowly missing an automobile accident.

Stress from physical activity, if not carried too far, is actually beneficial. Probably most harmful of all stresses is guilt. This common emotion is useful to have when it helps us realize that we have, in fact, committed some error, violated our own rules or social norms. If we did not feel guilt, we would never do anything except the things that brought us immediate pleasure—we'd never obey the law, work, or even study in school, unless we wanted to do so in the first place. As a person's conscience develops, guilt feelings become inevitable; guilt is the sorrow we experience when we know we have done something incorrect.

Many of us as children learned rules that we no longer need. For instance, a successful business person needs not feel guilty about spending a little too much money on a vacation, or should she/he feel guilty that she/he can combine a business trip with some swimming and golf at an ocean resort. But many people do feel guilty over such apparently innocent actions. Excessive guilt can make life not worth living; guilt can cause self-hatred as well as other fears and anxieties that cause all life's successes to be bittersweet, at best.

Guilt and the worry that often accompanies this major stress are difficult to eradicate, but people subject to excessive guilt feelings should realize, as simple as it sounds, that no one is perfect. People cannot always be cheerful and helpful to everyone they meet. Another good lesson is that mistakes should be forgotten, not lingered over and brought out to examine periodically.

A life without stress would be boring. Just as we need a little guilt to keep us correct, and a little worry to make us plan ahead, we need a little stress to stay interested in life. But, when stress begins to bother you, change your routine. Take your mind off your worries with some activities, whether tennis, yoga, gardening, or meditation. Or talk your worries over with someone else; you may discover a solution you had overlooked before.

- 16 What is the best title for the passage?
- (A) Key findings about stress (B) Stress: Causes, symptoms, and management
(C) The best way to escape stress (D) Physical stress and mental stress
- 17 According to the passage, which of the following statements is **NOT** true?
- (A) Worry often accompanies guilt.
(B) Some of us feel guilty about very innocent actions.
(C) A person's respiration rate increases during a stressful situation.
(D) Guilt has no beneficial effects on human beings.
- 18 We can conclude from this passage that _____.
(A) a stress-free life would be ideal
(B) an increase in heartbeat rate can only be caused by mental stress
(C) guilt is often self-induced
(D) worry is a more dangerous form of stress than is guilt
- 19 The passage suggests that _____.
(A) physical and mental stress in normal amounts are advantageous to man
(B) worry often causes physical stress
(C) physical stress can be more dangerous than mental stress
(D) the body is ill-equipped to deal with stress
- 20 According to the passage, the word "dilate" means _____.
(A) redden (B) depress (C) focus (D) expand
